

Vidyo for Triage & Disaster Response

What Are Your Needs?

- Can you easily bring together the right teams for comprehensive emergency planning?
- Can you easily conduct training with responders, hospitals, and trauma centers?
- Can you bring in expert consultants to aid in training, planning, and response?
- How easily can you connect responders during a response or response exercise?
- Can your emergency rooms and trauma centers see what is expected before it arrives?

When disaster strikes — natural or manmade — a coordinated and comprehensive response is critical to saving lives and protecting citizens. Disaster response requires extensive planning and training, expert triage, real-time assessment, interoperable communications, and a strong partnership with area hospitals and trauma centers. All responders must be able to communicate and coordinate services quickly and effectively. Connecting with the right healthcare providers, from planning to recovery, is critical to saving lives.

At Issue

The need for comprehensive planning, including support of healthcare institutions

The need for all-inclusive training that is consistent and ongoing

The need for real-time communication and data sharing between responders, hospitals, and trauma centers

The Vidyo Solution

The use of Vidyo eliminates much of the need for travel in the planning process, as well as the associate time and costs. Vidyo makes it easy to connect with anyone, regardless of their location, even for ad hoc meetings. With Vidyo you can bring in experts from across the country to assist with training and share best practices. Training can also be recorded and stored in a web-based archive for later access, review, and assessment by others.

Vidyo connects people using various devices from multiple locations, providing voice, visuals, and data. For real-time assessment and evaluation, Vidyo offers unprecedented video communication capabilities to ambulances and first-responder teams on the scene.

Agencies and experts can be on the scene without leaving their home base, increasing the ability to coordinate needed services and respond efficiently and effectively.
