

Vidyo®

API Development Services

Build custom video applications with the help of Vidyo's skilled API developer advocates

Use Cases

- **Internal Communication Hub:**
Custom chat, audio, and video platform for internal employee use
- **Healthcare Portal:**
Telemedicine solution purpose-built with patient and clinician experience in mind
- **Banking:**
Agent and customer portals with option to share documents, verify ID, and e-sign contracts
- **Call center solution:**
Customer service portal with custom video API for escalating calls to video meetings

Benefits

- **Custom Solution:**
Design a video platform that follows the exact workflow and user experience you need for your specific use case
- **Developer Advocate Support:**
Work directly with one of Vidyo's video API experts to bring your vision to life
- **Free Up Valuable Resources:**
Leave the heavy lifting to Vidyo's team, leaving your developers to focus on the big picture

Business Challenge

Designing a custom video application requires time, resources, and developer expertise. Mapping out the capabilities, workflow, and integration requirements can be overwhelming without the necessary experience.

Your company needs a way to streamline the design process and minimize the time your developers spend on implementation while still having complete control over the custom user experience and features within their solution.

Vidyo Solution

With Vidyo's API development services, your company's developers are free to focus on the user experience while leaving the video communications to our experts. Vidyo's dedicated API consultation services, provided by an experienced API Developer Advocate, will help your organization build their video applications to fit the unique use case and workflow needs.

Your company will also have access to optional on-demand Vidyo.io developer training that includes code walk-through videos, key concepts, live demos, quick start guides, how-to videos, troubleshooting best practices, and more, all at an affordable rate.

Anticipated Results

By leveraging Vidyo's API development services, your organization benefits from a fully integrated, custom video solution that works seamlessly with your existing solutions and provides an enterprise-grade user experience.
