

Vidyo®

Long Term Care

Enabling Residents to Connect with Family and Doctors at Home

Use Cases

- Virtual coordination of care with residents, family, and multi-disciplinary teams to ensure appropriate follow-up and easy access
- Use remote resident monitoring to identify early intervention opportunities
- Safely coordinate care, manage chronic disease states, and educate residents

Benefits

- Engage with resident to provide real time assessments, coordinate care, and improve adherence
- Highest quality video ensures natural and immersive communication with family members and doctors
- Optimize clinical efficiencies through virtual triage and expanded resident access
- Monitor and provide quick intervention for resident at risk for falls

Healthcare Challenge

Decreasing preventable hospitalizations is fundamental to the “Triple Aim” of improving care, enhancing health, and reducing costs for health systems. In addition, improving resident adherence is important to help long term care systems address challenges such as chronic disease management and care coordination. Many of the top long-term care health systems are implementing virtual care to help them achieve goals of enhancing operational efficiency, clinical outcomes, and the delivery of premier resident service.

Long term care systems require leading-edge solutions that are natural, inviting, and easy to use.

Vidyo Solution

Vidyo provides a suite of solutions for healthcare systems seeking to expand their resident care models to address the triple aim. With easy-to-use video interfaces, the solutions provide systems with the ability to review medical information with residents, collaborate on cases, and connect residents with their families at their bedside.

One solution, VidyoConnect™, increases resident engagement by providing a captivating, convenient, and safe communication platform for residents who may have trouble moving from their bed or wheelchair. VidyoConnect can be easily integrated with the provider’s EHR solution and workflows, browser and mobile-based resident portals, and existing scheduling tools. In addition, VidyoConnect supports WebRTC, an exciting technology that makes it possible to use browsers without installing plugins or applications.

Unlike other telemedicine solutions, Vidyo solutions deliver the reliability, interoperability, and scalability needed for today’s constantly changing environment. They are HIPAA-compliant solutions that enable residents to access practitioners easily.

“Remote resident monitoring in the home setting is the second most prevalent use of virtual health technologies employed by health systems, following emergent care.”

-Healthcare Informatics

Anticipated Results

With access to Vidyo’s comprehensive suite of solutions long term health systems will have the tools to transform their delivery care model into one that dramatically improves clinical efficiency, outcomes, and resident adherence while keeping costs under control.

Having safe, easy to use, and engaging interfaces will enable long term healthcare systems to focus more time on what matters most: resident care.

VidyoConnect offers a unified user experience across mobile, desktop, and clinically-focused endpoints such as a Patient Room Experience, designed for a care setting. The VidyoConnect suite of solutions delivers the consistency, ease of use, and rich features that drive clinical adoption across the care continuum.

Feature Overview

Easy for Residents to Use

Include the features and functionality that you need, and none of the functionality that you don't

Extensive Peripherals

Integrate medical peripherals including exam cameras and digital stethoscopes

High-Quality Audio/Video

Replicate the in-person experience and respond quickly and evaluate residents after a fall

Epic Monitor integration for resident monitoring

Provides residents with the ability to stay in touch with their care team, review their schedule, access personalized resident education materials, and request help

Premiere Resident Privacy

Streamlined functionality ensures that residents only connect to the meetings scheduled by their practitioners (Patient Room Experience)

Control and Privacy

Fully encrypted HIPAA compliant solution on both media and signaling

Branding and White Labeling

Can be customized for an organization's brand

Call Recording

Optional call recording for consult review or resident education training

Connect a calendar account

Deep calendar integration with Microsoft Outlook and Google Calendar

Customizable Help Screen for Residents

Provides custom messages that makes it easy for residents to know how to use or how to get help (Patient Room Experience)
